

COMMERCIAL SOLAR · ZERO UPFRONT

Switch to solar today with Aura Energy.

We fund, install and operate commercial solar on your roof. You buy the power it makes at a fixed rate below your grid rate, locked in for the full term. Prefer to own it? We offer capex purchase too.

€0	Up to 50%	25 yr	6–10 wks
Upfront cost on a PPA	Below grid rates, day one	Panel performance warranty	Survey to installation

You buy the power. We handle everything else.

HOW A SOLAR PPA WORKS

01

We fund it

We pay for the design, panels, installation and insurance, and we own and maintain the system for the full term.

02

Your roof makes power

Sized to your load and installed in days. We handle the ESB Networks application. Live monitoring shows every kWh it makes.

03

You pay less per unit

A fixed rate per kWh, below grid, for every unit the roof produces. Your retailer still supplies the rest.

A commercial roof in Ireland returns about 950 kWh for every kilowatt on it, every year, for twenty-five years.

That number is reliable. The capital to unlock it usually isn't. So we put up the capital, take the performance risk, and sell you the output.

Buy the power, or buy the system.

The PPA puts clean energy on your roof with nothing on your balance sheet. If you'd rather own the asset from day one, we build capex systems too.

Solar PPA

RECOMMENDED

Solar as a service. €0 upfront, ever. We fund, design, install, insure and operate it. Maintenance, monitoring and performance risk stay with us. No capex, no loan, nothing to finance.

Typical commercial grid rate ~32c/kWh

Aura Solar PPA rate from ~16c/kWh

Illustrative, November 2026. Your rate depends on site, system size and term.

Capex purchase

YOU OWN IT

For businesses ready to deploy capital. You own the system from day one and all of the power is yours. SEAI grants and Accelerated Capital Allowances can reduce the net cost, and our optional O&M package keeps it monitored and maintained.

25-year system life payback in 4-6 yrs

Years 1–5 pay the system back Years 6–25: free power

Typical range. Payback depends on site, usage and grants.

	Solar PPA	Capex purchase
UPFRONT COST	€0	Full system cost, less grants
WHO OWNS IT	Aura Energy, during the term	Your business, from day one
WHAT YOU PAY	A fixed rate per kWh, below grid	Nothing per kWh
MAINTENANCE	Included, our responsibility	Yours, or our O&M package
PERFORMANCE RISK	Ours. You only pay for power produced	Yours
FINANCING	None. Nothing to borrow or approve	Your capital, or a loan
BEST FOR	**Preserving capital, instant savings**	**Maximising lifetime return**

From first call to first savings

FOUR STEPS

01
Survey
Free site and bill assessment. Your roof, your usage, your grid connection.

02
Design
A system sized to your load, with your PPA rate and a capex price side by side.

03
Install
On site in 1–3 days, insured and grid-compliant. ESB application handled.

04
Save
Every kWh from your roof costs less than the grid. Live monitoring shows it.

Ready to pay less for power?

Free site assessment. Response within one business day. No obligation.
